

CODEREDCAT

4K VECTOR LANDSCAPE

CodeRedCat

4k Vector Landscape Documentation

A simple parallax background

CODEREDCAT 4K VECTOR LANDSCAPE

4k Vector Landscape Documentation

This package includes:

- 4 background options
- Each background option has 7 Layers
- Each layer consists of a top image and a main image
- All layers have their original .ai file and a svg. File included

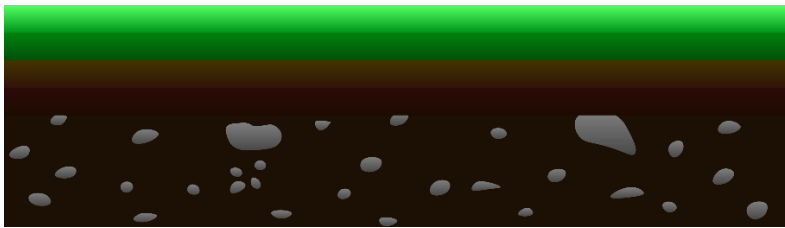

Figure 1: Top image – Repeats left and right, can repeat to the bottom if the Main Image is bellow

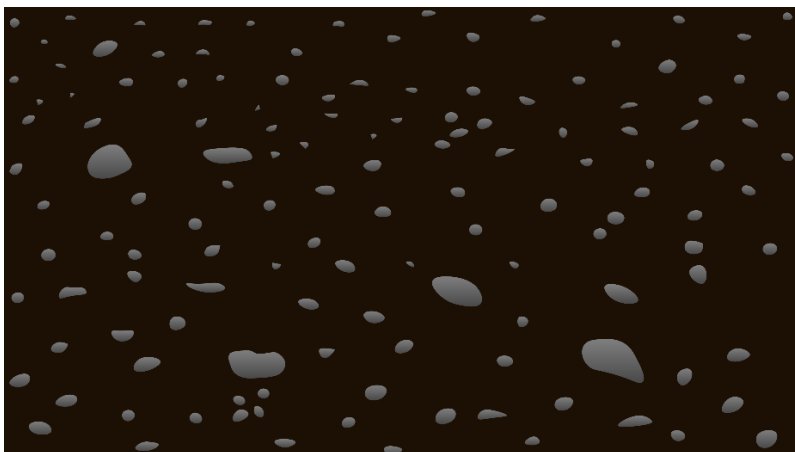

Figure 2: Main image – Repeats to all directions

CODEREDCAT 4K VECTOR LANDSCAPE

Seamless image repetition

- The top image will repeat itself to the left and right
- The main image will repeat itself in all directions
- The top image will repeat to the main image at the bottom side
- Each background option has a sun or moon

Usage:

- It is recommended to use a coding asset, that can do a parallax effect
- These images have been made to be working with <https://gitlab.com/CodeRedCat/anchoredparallaxscroller> , but other projects/assets can be used
- Use the images on a SpriteRenderer Component, an Image Component or a similar Component, that can display the images
- You can use the source files to edit the image colors and make them match with your visuals
